

SAINT LOUIS UNIVERSITY™

GRADUATE EDUCATION

Athletic Training

+ Doisy College of Health Sciences

Saint Louis University is a world-class Catholic, Jesuit institution educating nearly 13,000 students on two dynamic, urban campuses - in St. Louis, Missouri, and Madrid, Spain. Founded in 1818, the University is celebrating its bicentennial.

With a legacy of innovative academics and research, compassionate health care and faithful service, Saint Louis University attracts a diverse community of scholars who push intellectual boundaries in pursuit of creative, meaningful ways to impact the world, striving to serve a higher purpose and seek a greater good.

OVERVIEW >>

Athletic trainers collaborate with physicians to optimize activity and participation of athletes, patients and clients and are recognized by the American Medical Association as health care professionals.

The Master of Athletic Training degree is a two-year, six-semester, postbaccalaureate program that prepares students to become qualified health care professionals. The M.A.T. program includes coursework in human anatomy, kinesiology, emergency care, assessment, treatment, rehabilitation, research and administration. Upon graduation, students are eligible to take the board certification examination for the Certified Athletic Trainer (ATC) credential. Saint Louis University graduates have an outstanding record on the ATC exam and on placement after graduation.

SLU athletic training students participate in clinical experiences each semester and the diversity of clinical sites is a hallmark of the program. In addition to Saint Louis University's athletic teams, eight other St. Louis universities and 20 high schools serve as clinical sites for the program. Students experience unique networking opportunities such as physician office rotations, NCAA championship events and summer camps.
